Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 August 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1, 3, 5-11, 13-14, 16, 18-22, 24, 26 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

3. Claims 1, 3, 5-11, 13-14, 16, 18-22, 24, 26 are further rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

There is no disclosed mechanism of selecting as claimed. There is no disclosure as to how members 248, 228 have any interaction with the remainder of the invention to enable these claims. There is no disclosure how the stop pin connector is secured to the stabilizer bars 240a, 240b. Applicant shows an apparently disconnected member 248 with no effective disclosure as to its connection to members 240a, 240b. There is no disclosure as to how intermediate positions of the assembly 228 are effective. There is no disclosure as to how the notch 126 accommodates the assembly 228 in selective manner.

Art Unit: 3612

There is no disclosure as to how the stop pin assembly rotates down and toward door plate 104 (page 16, line 1). There is no disclosure as to how the stop pin assembly can be rotated to reach a maximum height relative to the hinge stabilizer 150 (page 16, lines 15-16). It is clear from applicant's response that this invention has not been completed as of the date of filing. Further examination would appear to be futile at this stage of disclosure.

As this stop pin assembly is potentially the point of novelty of this invention, given the references of record, this disclosure is critical to any potential patent. It does not appear that it would be possible to amend this application to correct the missing disclosure without adding new matter. Applicant may wish to consider filing a C.I.P. application to disclose the full invention.

4. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the details of claims 1 and 14, a means for selecting whether the door opens horizontally ...or opens vertically..." must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the

Art Unit: 3612

drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Contrary to applicant's remarks, there is no illustration of the stop assembly in operation.

Claim Objections

5. Claim 11 is objected to because of the following informalities: This claim dependent from claim 10 apparatus, is not a method claim. Appropriate correction is required.

Oath/Declaration

6. The declaration of 5/16/2005 is made of record.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3612

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

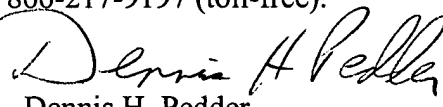

Response to Arguments

8. Applicant's arguments filed 8/23/2005 have been fully considered but they are not persuasive. Please see the above action, as detailed as possible given the disclosure.
